

Christmas Tree Recycling

Christmas Trees will be picked up curbside after January 1st. Please remember that all decorations **MUST be removed from the trees before placing them curbside.**

After January you must call for a scheduled pick or you can drop it off at our Material Handling Facility 1271 S. Mill Rd just past Walnut Road at your convenience between the hours of 8am – 3:30pm Monday through Friday and Saturday 9-1pm except holidays.

Recycle Your Tree - Instead of just throwing out that Christmas tree, how about trying something different this year. Your discarded tree can be useful far beyond the holiday season.

- **Food, cover and water are the three requirements of winter songbirds. Your old Christmas tree can be used as shelter and protection for these birds. The tree will be especially good for the birds during harsh winter storms.**
- **To add food, place pine cones with peanut butter or a suet and cornmeal mixture on the tree. Also String Popcorn and hang on tree as garland and food for the birds.**
- **As the winter passes into spring, your Christmas tree may even become a nesting site for birds that are year-round residents. Squirrels and chipmunks often find shelter under the lower branches of Christmas trees too.**
- **You might consider converting your tree into mulch that can be used in your landscape by recycling your tree at our Material Handling Facility on Mill Road. We grind the Christmas trees we collect curbside in January which is then used as mulch in the Spring.**
- **Mulch conserves moisture, suppresses weeds, insulates the roots from temperature extremes, protects sloping ground from soil erosion and makes areas like paths, play areas and sitting areas more attractive and usable.**
