

TV "CONVERTER BOX" COUPON

As of February 18th, 2009, anyone who doesn't own a digital TV set and still gets their programming with an antenna, will no longer be able to receive a picture without a "converter" box.

The National Telecommunications and Information Administration is accepting requests for two \$40 coupons per household to be used toward the purchase of the converter boxes. A converter box will cost \$50 - \$70 from most major electronics retailers.

The converter box is not necessary for those who have satellite or cable service. Go to www.dtv2009.gov to request a coupon or call the 24 hour hotline 1-888-DTV-2009 (1-888-388-2009).
